

Adaptive Prompts for Personalized Learning

Objective: Assessing the ability to create adaptive prompts that cater to individual learner needs.

Task: Design a set of adaptive prompts for a specific learning domain or skill. The prompts should dynamically adjust based on the learner's responses and adapt to their individual learning needs. Implement an algorithm or strategy for prompt adaptation, considering factors such as learner proficiency, preferences, and progress.

Submission:

Submit the shared link of your prompt window, where you tried the set of adaptive prompts showing the process itself.

Evaluation:

This assignment aims to foster an in-depth understanding of how prompt engineering can transform your educational experience by enabling more effective and personalized interactions with AI technologies. It encourages participants to think critically about the role of technology in education and its implications for their learning and academic integrity. The assignment will be peer-reviewed using the rubrics below.

Assignment 2.						
Criterion	Ratings					points
Adaptive Prompt Design	4.0 points Full marks Prompts are innovative, well-structured, and clearly tailored to the learning domain or skill.	3.0 points Good Prompts are well-structured and tailored to the learning domain or skill.	2.0 points Satisfactory Prompts are somewhat tailored to the learning domain or skill but lack innovation.	1.0 points Needs improvement Prompts are poorly structured and not tailored to the learning domain or skill.	0.0 points No marks	4.0 points
Flexibility and adaptability of prompts based on learner responses	4.0 points Full marks Prompts show high flexibility, dynamically adjusting to a wide range of learner responses.	3.0 points Good Prompts show good flexibility, adjusting to most learner responses. Prompts incorporate most learner preferences, enhancing engagement.	2.0 points Satisfactory Prompts show some flexibility, adjusting to a limited range of learner responses.	1.0 points Needs improvement Prompts show little to no flexibility, not adjusting to learner responses effectively.	0.0 points No marks	4.0 points
Consideration of learner proficiency and preferences	4.0 points Full marks Prompts are highly responsive to varying levels of learner proficiency, providing appropriate challenges. Prompts fully incorporate learner preferences, enhancing engagement and motivation.	3.0 points Good Prompts are responsive to different levels of learner proficiency, providing suitable challenges.	2.0 points Satisfactory Prompts are somewhat responsive to learner proficiency but may not always provide suitable challenges. Prompts incorporate some learner preferences but lack consistency in enhancing engagement.	1.0 points Needs improvement Prompts do not effectively consider learner proficiency, often providing unsuitable challenges. Prompts do not consider learner preferences, failing to enhance engagement.	0.0 points No marks	4.0 points

Personalization	4.0 points Full marks Prompts are highly personalized, catering to the unique needs and progress of each learner.	3.0 points Good Prompts are personalized, catering to the needs and progress of most learners.	2.0 points Satisfactory Prompts are somewhat personalized, catering to the needs and progress of some learners.	1.0 points Needs improvement Prompts lack personalization, failing to cater to the needs and progress of learners.	0.0 points No marks	4.0 points
Effectiveness in addressing individual learner needs	4.0 points Full marks Prompts effectively address individual learner needs, facilitating significant progress.	3.0 points Good Prompts address most individual learner needs, facilitating good progress.	2.0 points Satisfactory Prompts address some individual learner needs, facilitating moderate progress.	1.0 points Needs improvement Prompts fail to address individual learner needs, resulting in minimal progress.	0.0 points No marks	4.0 points

Dynamic adjustment of prompts based on learner progress	3.0 points Full marks Prompts dynamically adjust in real-time based on learner progress, ensuring continuous relevance.	2.0 points Good Prompts adjust based on learner progress but may have minor delays or inconsistencies.	1.0 points Satisfactory Prompts adjust based on learner progress but lack real-time responsiveness.	0.0 points No marks	3.0 points
Ease of use and intuitive nature of the adaptive prompt system	3.0 points Full marks The adaptive prompt system is highly intuitive and easy to use, requiring minimal learner effort.	2.0 points Good The adaptive prompt system is easy to use and intuitive, with minor usability issues.	1.0 points Satisfactory The adaptive prompt system is somewhat intuitive but may have usability issues that hinder learner experience.	0.0 points No marks	3.0 points

Total score: 30.0 out of 50 points
